**ADA ACCOMODATIONS:** If you require reasonable accommodations or auxiliary aids and services such as material in alternate format or a sign language interpreter, please contact the ADA (Americans with Disabilities Act) Coordinator at (310) 305-9538 (Voice) or (TTY/TDD) users, please call the California Relay Service at 711. The ADA Coordinator may be reached by email at rstassi@bh.lacounty.gov.
Chair Rifkin called the meeting to order at 10:05 a.m. followed by the Pledge of Allegiance, and read the Commission’s policy on public comments.

Approval of Minutes:
Chair Rifkin requested to have the minutes amended to reflect that he abstained from approving the April 9th minutes due to his absence.

Motion to approve the amended July 9, 2014 minutes by Commissioner Lesser, seconded by Commissioner Lumian, unanimously approved.

Ayes: 3 – Chair Rifkin, Mr. Lesser, Mr. Lumian

Item 3 – Communication from the Public:
Douglas Fay expressed concern with the maintenance of the Oxford Basin area.

Chair Rifkin requested to have this item be presented at the next meeting.

Jon Nahhas spoke about the boating strategic plan not being on the agenda and about the vacancy rate.

Chair Rifkin asked if staff has any updates on the recreational boating strategy.

Mr. Jones reported that staff is in the process of taking comments and that a comprehensive report will be presented to the Commission at a later date.

Commissioner Lesser noted the Commissioners were provided with a list of all boating assets, including facilities and activities that are available in the Marina. He would like to discuss this item further.

Mr. Jones stated that the updated list will be provided along with the responses to the projects and items discussed. He further stated that he would like to receive input from the Commission and the public on the strategies the Department takes regarding recreational boating.

Item 4 – Communication with the Commissioners
Commissioner Lumian disclosed he had communication with several individuals.

Chair Rifkin reported that he signed letters to the Supervisor Knabe and the Department of Regional Planning regarding the Visioning Process.

Item 5a – Marina Sheriff
Deputy White presented both the Liveaboard and Crime Stats reports.
Commissioner Lesser asked about the theft report.

Deputy White stated that most thefts were from crimes of opportunity, including the grand thefts of stolen bicycles.

Commissioner Lesser noted that from looking at the statistics the Marina is a safe and almost crime free area.

Deputy White concurred.

Chair Rifkin extended an invitation to the new captain to attend the meeting.

Deputy White stated he will pass on the invitation.

**Item 5b – Marina del Rey and Beach Special Events**
Ms. Baker presented the staff report.

**Item 5c – Marina Boating Section Report**
Ms. Talbot provided a status update on Mast-Up Storage, Parcel 77 and the Waterbus. The written responses to Commissioner Lumian’s questions were provided to the Commissioners and the public.

**Item 5d – Marina del Rey Convention and Visitors Bureau**
Janet Zaldua talked about the various media outreach to promote Marina del Rey, and presented a PowerPoint presentation on the promotion of “Beach Buddies”. She also discussed the hiring of a business development manager.

Jon Nahhas commented on providing more programs and diverse music for the public.

Douglas Fay complimented Ms. Zaldua’s presentation. He suggested surveying the public to find out the types of programs that the public would like to have.

Commissioner Lumian thanked the Boating Section for responding to his questions. He expressed concerns about the website stating that only sailboats up to 28-feet are allowed to be stored at the location, and that people have found it difficult to submit applications. He asked if those 74 vacancies included or excluded the powerboats.

Mr. Jones responded that they included the powerboats.

Ms. Talbot confirmed.

Commissioner Lumian asked when the powerboats are moved will the vacancy number go up.

Mr. Jones replied that it would go up by 10 or 11 spaces.

Commissioner Lumian inquired as to how long the information was posted online regarding the application for Mast-Up Storage not being accepted.

Mr. Jones stated that he did not know the answer nor did he know the reason as to why it was posted.

Commissioner Lumian would like to see an online application be available.

Mr. Jones stated the systems are being revamped and expanded.

Chair Rifkin stated those are the types of suggestions that need to be listed in the boating strategies. He also mentioned having a survey for future events to see demographically who visited Marina del Rey.
Item 6a – Update on Marina del Rey Visioning Statement

Gina Natoli provided an update on the Visioning Statement. She reported they are working on revising and preparing the Statement for the Regional Planning Commission (RPC) review in early September. The documents would then be submitted to the Board of Supervisors (Board) in October. In preparation for the document to go before the RPC meeting it would be released for public review at the end of August.

Jon Nahhas played an audio recording of a meeting; he spoke about the launch ramp, public participation and process.

Chair Rifkin asked if Ms. Natoli was aware of a letter sent to Supervisor Knabe and Mr. Bruckner.

Ms. Natoli replied yes that she has seen it.

Chair Rifkin stated he would like to go on record and expressed that he was not aware Supervisor Knabe in any way directed the relocation of Fisherman’s Village.

Commissioner Lumian stated that the Commission was informed the new plan would be available for review since it would not go to the RPC until September.

Ms. Natoli responded that the document needed to be revised and the final comments needed to be incorporated before the RPC meeting.

Commissioner Lumian stated that the next SCHC meeting is on September 10th and asked if the document would be available for review and public input.

Mr. Jones stated he thought the Commission would have the opportunity to review and provide additional comments before it goes to the RPC. He also stated that the Commission and the public can provide comments at any time while the document is being presented to the RPC and later to the Board.

Commissioner Lumian asked if the draft document would be available at the September 10th meeting.

Mr. Jones responded that once the draft is released it can be distributed for review and the items be placed on the agenda for discussion at the next meeting.

Commissioner Lumian invited Ms. Natoli to come back in September.

Chair Rifkin stated he supports attending the RPC meeting and getting more input from the public.

Commissioner Lumian asked for confirmation that the Fisherman’s Village is to stay where it is and that the launch ramp would not be moved.

Ms. Natoli replied that that is correct. She stated that the RPC meeting is either on September 10th or 17th and any comments made would be submitted along with the document when it goes to the Board.

Commissioner Lumain suggested that if the SCHC meeting conflicts with the RPC meeting it should be rescheduled to a different day.

Mr. Jones responded that a special meeting can be coordinated.

Commissioner Lesser stated that focus was lost on the rest of the report because of the Fisherman’s Village and launch ramp issues.
Captain Alex Balian commented on the issue of timing and how the public input can be provided before the draft is presented to the RPC.

Ms. Natoli responded that the Visioning Statement would be released at end of August and would be available for public comment up until the RPC meeting.

Chair Rifkin stated due to the RPC schedule the most effective way for the public to provide input is by writing letters and directing comments at the RPC and the Board meetings. He further stated that there will also be an opportunity to provide comments at the next SCHC meeting.

Patricia Younis asked when the public comments will be available, what are the changes, and if comments from the RPC will be drafted for review or would it be sent along with the drafted document to the Board.

Ms. Natoli responded that the public comment period will be from when the draft document is released until the RPC meeting. The boat launch ramp has been completely removed from the document and staff cannot make changes unless they are being directed by the RPC. When the document is released for submission to the Board the public comment period will be available.

Commissioner Lesser asked if the document can be presented to the RPC on September 17th.

Ms. Natoli stated she will check.

Mr. Jones thanked Ms. Natoli for her updates and assistance in moving the project along.

Commissioner Lumian stated if the RPC meeting ends up being a conflict with the SCHC meeting, he suggested reschedule the SCHC meeting.

Mr. Jones replied he will keep it in mind.

**Item 7 – New Business**
None

**Item 8 – Staff Reports**
Mr. Jones provided the staff report.

Mike Pashaie provided an update on the status of Fisherman’s Village.

Aaron Clark talked about the regulatory process and public support.

Chair Rifkin would like to have a timeline with specific steps, and requested they work with staff to provide the information.

Mr. Clark stated the next step is the proprietary side, and would work with staff on the request.

Mr. Pashaie added that the timing is about a year and a half to two years.

Jon Nahhas talked about land use changes and the LCP, docks refurbishment and displacement plan.

Captain Alex Balian read item number two from Resolution No. 2014-07-09 and asked if that is the plan moving forward. He also agreed that a list of action items and dates is needed.

Mr. Clark stated that an LCP amendment is not required.

Commissioner Lumian reported that he met with Mr. Pashaie to discuss the idea of having dinghy docks at Fisherman’s Village. He stated that they would need the Department’s help to implement.
Mr. Jones reported that he did meet with Mr. Pashaie to discuss his concern but have found a way to make the docks available without displacing long time boat tenants.

Commissioner Lumian felt that this was a big improvement and he encouraged looking at other places for dinghy docks. He stated that at the last meeting when the TMDL item was presented he requested additional information on the $4 million budget that was approved by the Board. He would like to have an update on this item and answers to his questions.

Mr. Jones responded that concerning the TMDL, the County is working to prepare for the State Water Board hearing and if any new development occurred, the Commission will be provided with a status update. In the meantime a briefing on the Board approved funds and studies could be provided.

Commissioner Lumian requested to have a breakdown on how the money is going to be spent.

Commissioner Lesser would like to have an update on the Oxford Basin Project.

**Adjournment**
Chair Rifkin adjourned the meeting at 11:43 a.m.

SUBJECT: ITEM 8 - ONGOING ACTIVITIES REPORT

BOARD ACTIONS ON ITEMS RELATING TO MARINA DEL REY

On August 5, 2014, the Board of Supervisors approved the proposed Beach Restrooms Refurbishment Project for Manhattan, Redondo, and Royal Palms Beach facilities with a total budget of $2,686,400 and authorize the Director of Public Works to deliver the project using a Board-approved Job Order Contract; approved the allocation of $2,686,400 from the Safe Neighborhood Parks Propositions of 1992 and 1996 to the Department of Beaches and Harbors for the project; authorized the Director of Beaches and Harbors, as agent of the County, to accept the grant funds, conduct all negotiations, and execute and submit all documents including, but not limited to, the grant agreement, amendments, and payment request.

Also, on August 5, 2014, the Board of Supervisors reappointed Allyn Rifkin to another term on the Small Craft Harbor Commission. Mr. Rifkin will continue to act as the appointee for the 3rd Supervisorial District.

On August 12, 2014, the Board of Supervisors authorized the Director of Public Works to execute the proposed Marina del Rey Harbor Toxic Pollutants Total Maximum Daily Load Coordinated Monitoring Plan Memorandum of Agreement (MOA), effective upon final execution by the County, County Flood Control District (District), Culver City, City of Los Angeles, and the State of California Department of Transportation through July 7, 2016, for an estimated Net County Cost not to exceed $1,662,040.58; execute any necessary amendments to the MOA, provided that cost related amendments are budgeted and do not increase the County’s annual cost by more than 10%; and accept the transfer of $119,497.51 to the County in unused deposits held by the District; acting as the Governing body of the District, authorize the Chief Engineer to execute the MOA for the District to transfer $119,497.51 in unused deposits to the County, which will act as the contract administrator under the new MOA.
REGIONAL PLANNING COMMISSION’S CALENDAR
No items relating to Marina del Rey were heard by the Regional Planning Commission during meetings for the month of August 2014.

A hearing will be held on September 17, 2014 before the Regional Planning Commission regarding the revised Marina del Rey Visioning Statement.

CALIFORNIA COASTAL COMMISSION CALENDAR
No items relating to Marina del Rey were heard by the California Coastal Commission during meetings for the month of September 2014.

VENICE PUMPING PLANT DUAL FORCE MAIN PROJECT UPDATE
There has been no update on this item since the last meeting. On June 18, 2014, representatives from the City of Los Angeles and the County Departments of Regional Planning, and Beaches and Harbors met to discuss the Coastal Development Permit (CDP) from the County required for the Venice Dual Force Main project. The representatives from the various departments discussed how best to coordinate the Dual Force Main Project with other planned projects in the Marina, to minimize impacts to Marina visitors and residents. A CDP for the project was filed with the Department of Regional Planning on May 21, 2014. The City will also need to secure a CDP from the California Coastal Commission for the segment under the Marina’s main channel.

REDEVELOPMENT PROJECT STATUS REPORT
The updated Marina del Rey Redevelopment Projects Descriptions and Status of Regulatory/Proprietary Approvals report is attached.

DESIGN CONTROL BOARD MINUTES
The July 2014 minutes are attached.

MARINA DEL REY SLIP REPORT
The overall vacancy rate across all anchorages in Marina del Rey stood at 16.3% for July 2014. After adjustment to remove out-of-service slips and 50% of available double slips, the vacancy rate was at 15.5%. The vacancy data by anchorage and slip length are provided in the document attached.

CALIFORNIA COASTAL COMMISSION SLIP REPORT
Pursuant to certain conditions of the Coastal Development Permit (5-11-131) issued by the California Coastal Commission, the County is required to maintain certain minimum thresholds of slip sizes as a percentage of the entire Marina. The attached document outlines the percentage of each size category as a percentage of all available slips in the Marina.
Gina Natoli of the Department of Regional Planning (DRP) provided a status report on the Visioning Statement at the last month’s SCHC meeting. On September 4, 2014 the revised Visioning Statement (attached) was released by DRP for public review. The revised Visioning Statement will be presented to the Regional Planning Commission at its September 17, 2014 meeting.

Los Angeles County Department of Beaches and Harbors, Planning Division.
DESIGN CONTROL BOARD MINUTES
July 16, 2014

Members Present: Peter Phinney, AIA, Chair (Fourth District); Helena Jubany, FAIA, Vice Chair (First District); Tony Wong, P.E., Member (Fifth District)

Members Absent: Simon Pastucha, Member (Third District)

Department Staff Present: Gary Jones, Director; Charlotte Miyamoto, Planning Division Chief; Carol Baker, Community and Marketing Services Division Chief; Michael Tripp, Planning Specialist; Yeni Maddox, Secretary

County Staff Present: Samuel Dea, Department of Regional Planning; Amy Caves, County Counsel

Guests Testifying: Paul Wong, Department of Beaches and Harbors; Kevin Berry, Associated Sign; Leo Cho, Grace Partnership Inc.; Gina Natoli, Department of Regional Planning

1. Call to Order and Pledge of Allegiance
   Chair Phinney called the meeting to order at 1:34 PM

   On a motion of Mr. Wong, seconded by Vice Chair Jubany, the absence of Mr. Pastucha was excused.
   
   Ayes: 3 – Chair Phinney, Vice Chair Jubany, and Mr. Wong

   Vice Chair Jubany led the Pledge of Allegiance.

2. Approval of June 18, 2014 minutes.

   On a motion of Mr. Wong, seconded by Vice Chair Jubany, the June 18, 2014 minutes were approved.

   Ayes: 3 – Chair Phinney, Vice Chair Jubany, and Mr. Wong

3. Public Comment

6. **New Business**
   A. Parcel 49S – Marina del Rey Launch Ramp – Consideration of renovation project credit sign and Design Control Board Review related thereto – DCB #14-004

   Mr. Tripp presented the project staff report.

   **Public Comment**
   None

   **Board Comment**
   Member. Wong requested clarification that the Launch Ramp will not be relocated.

   Mr. Tripp reiterated that the Launch Ramp relocation will no longer be included in the visioning process.

   Vice Chair Jubany asked if the proposed sign is typical of all County signs.

   Mr. Tripp replied that the proposed sign is different from the standard County signs, however it is typical of the credit signs used by State Parks’ Division of Boating and Waterways (DBAW).

   Vice Chair Jubany stated the sign looked very old fashioned and explained that the general expectation of the DCB is to have more contemporary signs for the Marina. She also inquired about the other signs typically used by the Department of Beaches and Harbors (DBH) in the Marina.

   Mr. Tripp replied that DBH’s signs have a dark blue background with yellow graphics on them.

   Vice Chair Jubany asked why the proposed sign is different than DBH’s signs.

   Mr. Tripp replied that the proposed sign is a standard for DBAW’s credit sign, which they have requested to acknowledge their funding of this project.

   Vice Chair Jubany recommended that the words, “Los Angeles” on the proposed sign appear all on the same line.

   Chair Phinney reiterated Vice Chair Jubany’s concerns about the design and inquired about the possibility of suggesting alternate designs, which would delay the signage approval for another 30 days.

   Paul Wong replied that DBAW would not likely approve any suggested changes to the sign, as the proposed sign is the standard style that they use.

   Mr. Jones stated a delay in the approval of this sign for a one-month period would not be an issue. He also stated that staff could convey the DCB’s suggestions to DBAW for their consideration.
Member Wong stated that he has experience with state funding, and that they are very firm about the way that they want their sign to look.

Chair Phinney stated that he fully expected DBAW to come back and insist on the proposed sign, but he still wanted to suggest a more contemporary design.

Mr. Jones asked the Board members for design suggestions that staff can convey to DBAW.

Chair Phinney replied that it’s a matter of color and contemporary design, and mentioned that he will email samples of contemporary signs to staff.

Member Wong stated that the sign was a 1970’s design, and requested that the design be brought up to a 21st century standard.

**On a motion of Mr. Wong, seconded by Vice Chair Jubany, the Board recommended that the sign be redesigned to look like a twenty-first century sign.**

Ayes: 3 –Chair Phinney, Vice Chair Jubany, and Mr. Wong

B. Parcels 42/43 – Marina del Rey Hotel – Consideration of business identification signage and Design Control Board Review related thereto – DCB #14-004

Mr. Tripp presented the project staff report.

**Public Comment**
Patricia Younis complimented the sign’s design and inquired about the sign located on the corner of Bali Way and Admiralty Way, specifically about the signs integration with any new development project.

**Board Comment**
Mr. Tripp replied to Ms. Younis’ inquiry stating that the sign is a legal, off-site, non-conforming sign and because it was legally established it could remain in place as long as it doesn’t increase in size. He also stated that there aren’t any current plans to build a different use on Parcel UR and that even though the visioning process may imagine something different on the parcel in the future, that may not occur for 10 to 20 years.

Chair Phinney asked, if the DCB approved the sign with changes as a permanent offsite sign, could the DCB place a caveat that the sign should be reviewed annually, or was the sign grandfathered and could not be removed.

Mr. Tripp replied that the sign itself is protected, because it’s an offsite business identification sign and it’s been in place for years. He added that DBH controls Parcel UR, but was unaware of the arrangement under which the sign was permitted back then. He stated that this could be reviewed when the lease for Parcel 42/43 was up for renewal.

Chair Phinney asked County Counsel for advice regarding the proposed sign.

Ms. Caves stated that she would have to research further, but she wouldn’t advise taking any action at this point. Also, she suggested reviewing it in the future when the lease was up for renewal.
Mr. Tripp stated that approving a change to the style of the sign would not further grandfather it.

Chair Phinney asked for the expiration date of the existing lease.

Mr. Jones replied that the lease of the Marina del Rey Hotel had been extended for approximately 39 years to facilitate the renovation.

On a motion of Vice Chair Jubany, seconded by Mr. Wong, the item was approved as submitted.

Ayes: 3 – Chair Phinney, Vice Chair Jubany, and Mr. Wong

On a motion of Vice Chair Jubany, seconded by Mr. Wong, the motion was amended to include the requirement of a small directional arrow sign on the offsite sign.

Ayes: 3 – Chair Phinney, Vice Chair Jubany, and Mr. Wong

C. Parcels 7 – Waves – Consideration of residential community identification signage and Design Control Board Review related thereto – DCB #10-020-B

Mr. Tripp presented the project staff report.

Leo Cho stated that the new signs are only replacing existing signage and that the project should be completed in 2015.

Vice Chair Jubany requested to see the material samples.

Public Comment
None

Board Comment
Chair Phinney inquired about the identification signs located on the dock gates and stated that they’re only paralell to the fence and the promenade, and perpendicular to the gangway. He stated that these signs would not be visible to people walking along the promenade, and he asked the applicant if they had considered blade signs.

Leo Cho stated that he’s not the correct person to address Chair Phinney’s question due to his limited involvement with choosing the location of the sign. He then stated that the direction for the placement of the sign came from the owner’s design team.

Chair Phinney asked Leo Cho to relay his concerns to the owners in case they would like to return to the Board with a request for secondary signage.

On a motion of Vice Chair Jubany, seconded by Mr. Wong, the item was approved as submitted.

Ayes: 3 – Chair Phinney, Vice Chair Jubany, and Mr. Wong
D. Marina del Rey Visioning Update by the Department of Regional Planning

Gina Natoli confirmed that the concept to relocate the Launch Ramp will be removed from the Visioning Statement, and then proceeded with her presentation.

Mr. Wong expressed his concerns regarding traffic congestion and suggested creating an impact fee assessment for developers to solve transportation issues that may arise.

Gina Natoli stated the Visioning Statement is a broad and long term item and the details like Mr. Wong has suggested will be developed in conjunction with DBH, once the Board of Supervisors gives the Department of Regional Planning (DRP) direction for moving forward. Gina Natoli then asked Mr. Wong for any recommendations that he may have that could be added to the Visioning Statement.

Mr. Wong replied that he does not have any language or documentation but that he’s familiar with impact fees and development resolutions. He suggested that the visioning process should implement some guidelines so that the staff could have something in hand. He added that if he comes up with any language, he will e-mail it to Ms. Natoli.

Vice Chair Jubany inquired about the establishment of the commercial and hospitality section within the Visioning Statement.

Gina Natoli replied that it’s part of the visitor serving, commercial and retail discussion included in the Visioning Statement, which addresses the improvement of the visitor experience and allows commercial and retail uses to benefit improved mobility around the Marina.

Vice Chair Jubany stated that it was her understanding that the commercial and hospitality section would be located in the visitor’s district only. Ms. Natoli stated that the activity districts were not exclusive zones, and there could be instances where residential units may be proposed in a commercial area. She then stated that a couple of mole roads have restaurants, and that those kind of visitor uses could remain.

Vice Chair Jubany stated the DCB supports the current Marina residents, but they also recognize the Marina is a facility for all County residents. She further stated that she supports the idea of intermobility to connect the uses throughout the Marina.

Public Comment

Susanne Cumming spoke about the Boat Launch Ramp decision and asked about future plans for Fisherman’s Village.

Patricia Younis complimented Ms. Natoli on her outreach efforts on the visioning process and also complimented Supervisor Knabe on his statement that he would step back from his position on moving the launch ramp.

Board Comment

Vice Chair Jubany requested that staff answer the Fisherman’s Village question posed in public comment.
Mr. Jones replied that the Fisherman’s Village lessee is working on plans for a revised project, and stated that the Small Craft Harbor Commission was interested in receiving updates from the lessee. He also stated that a letter had been received by the Visitor’s Bureau from the Charter Operators, which expressed some of their concerns about the Visioning Statement. Mr. Jones stated that the letter had been forwarded to DRP.

Mr. Wong inquired about approximate dates that the visioning documents would be presented to the Regional Planning Commission (RPC) and the Board of Supervisors.

Gina Natolli responded that the documents would be presented to the RPC in August and to the Board of Supervisors at the end of September.

Mr. Wong inquired about the due date for the public to submit comments.

Gina Natolli replied that public comments needed to be submitted by the end of July or the first part of August.

Mr. Wong asked if DRP had a traffic engineer working on the project.

Gina Natolli replied that they do not have a traffic engineer working on the project because the Visioning Statement isn’t at a point where it’s required.

Mr. Wong stated that the residents’ concerns regarding traffic congestion need to be addressed and requested verbiage from DBH and DRP staff.

Chair Phinney asked when the visioning process’ public comment period would close.

Gina Natolli replied that the public comment would not close until the Board of Supervisors makes a decision on the document.

Chair Phinney suggested that staff write a letter informing the public about the public comment period being opened through the end of the process, and that DBH welcomes their participation. He added that the letter should be posted on DBH’s website.

Mr. Jones replied that DBH will collaborate with DRP to ensure that the information is posted on both websites.

Chair Phinney expressed his thoughts regarding traffic, the idea of Marina del Rey as a year-round facility, and the use of technology to make the Marina easier to navigate. He also suggested leaving the Visitor Center in its current location, but enhancing the library by adding a park. Lastly, Chair Phinney suggested making the developers aware of the importance of cost distribution and of leaving money in Marina del Rey for funding mobility.

Mr. Wong also stated that DBH needs to ensure that revenue stays in the Marina to allow improvements for local residents.

Mr. Jones stated that DBH captures revenue generated through development like leasehold sales, and proceeds are spent on Marina del Rey improvements. He further stated that Supervisor Knabe’s Motion, which was passed by the Board of Supervisors last year, allows some revenue to stay in the Marina.
Mr. Tripp added that the County also collects traffic fees from every new project, based on the number of traffic trips created. These fees are then allocated for marina improvements. He also mentioned that Public Works will be contributing a significant amount of money in the near future to Marina infrastructure improvements, and that DBH collects money for the coastal improvement fund, which can be used for improvements to bike paths, parks and similar projects.

Mr. Wong requested to view the amount of funds spent in the Marina, once all the money is collected.

Mr. Tripp stated that staff can request that information from Department of Public Works.

7. **Staff Report**
   Ms. Baker announced the summer activities, off season camps, summer concert series, extended water bus schedule, and free movie nights,

   All other reports were received and filed.

8. **Adjournment**
   Chair Phinney adjourned the meeting at 3:05 PM.

   Respectfully Submitted,

   Yeni Maddox
   Secretary for the Design Control Board
Note: Parcel 15 dock reconstruction project expected commencement date is September 2014.

INTRODUCTION

Marina del Rey is a small-craft harbor, visitor-serving destination, and residential community located in western Los Angeles County along Santa Monica Bay. The small-craft harbor was constructed in the mid 1960s. Residential, commercial, and visitor-serving development followed over the next two decades. Since it was originally created, Marina del Rey has matured, consumer tastes and recreational interests have changed, and a revised vision to guide future redevelopment is needed. This Vision Statement has been created to provide that guidance.

Purpose of the Vision Statement

This Marina del Rey Vision Statement establishes a framework to guide future decision-making on development, policies, and development standards as land use opportunities, economic/market conditions, special needs, and other opportunities arise or become available. This framework includes recommendations and proposed implementation actions, and identifies County departments anticipated to be responsible for implementation. The County will use the recommendations and proposed implementation actions in this document to achieve the following goals for Marina del Rey:

- Create a vibrant destination for all Los Angeles County residents and visitors.
- Support boating and other water-oriented activities.
- Promote environmental and sustainability goals shared with the California Coastal Commission.
- Provide low-cost access to the Marina’s waterfront and amenities.
- Provide a desirable place to recreate and live.
- Achieve County goals for economic development and revenue-generation by encouraging reinvestment in properties.

Before the County commits to implementing any aspect of the Marina del Rey Vision Statement or initiates any program that would be considered a project under the California Environmental Quality Act (CEQA), appropriate environmental documentation that has analyzed potential environmental impacts will be produced for consideration by the Los Angeles County Regional Planning Commission and/or Board of Supervisors.
EXECUTIVE SUMMARY

Public input, discussions with County advisory bodies, and technical analyses by consultants provide the basis for the ideas and recommendations presented in this Vision Statement. The major ideas and recommendations are depicted on the map on page 4 and are summarized below.

Input

Beginning in April 2013, County staff met with members of the public to hear their ideas and concerns about future development in Marina del Rey. Outreach activities included telephone interviews, a community kick-off question-and-answer meeting, community workshop and walking tour, numerous focus groups, stakeholder interviews, and an interactive town hall-style website. During that time, many individuals provided comments directly to staff and via email and telephone. Staff also met with the Regional Planning Commission, Small Craft Harbor Commission, and Design Control Board to take their input. The Department of Regional Planning contracted with consultants to perform technical analyses on existing conditions in the Marina and to provide suggestions for improvement.

The overarching themes that emerged from public, advisory body, and consultant input are:

- Create activity districts.
- Improve mobility and directional signage.
- Enhance the image of the Marina and its built environment.
- Enhance recreation opportunities.
- Provide public gathering spaces.

Recommendations

Working with the Departments of Beaches and Harbors and Public Works, the Department of Regional Planning evaluated the public input and consultant suggestions and makes the following principal recommendations:

- Cluster land uses into four districts:
  - The Residential District is intended to remain a predominantly residential area supported by resident-serving uses.
  - Marina Beach is intended to be developed with marine-related, beach-oriented, and other supportive uses.
  - Visitor’s Row is intended to be developed with visitor- and resident-serving uses and amenities.
  - Boater’s Way is intended to be a boating center where most boating-related businesses and services are located.
- Retain boat service, repair, and operations uses in the existing area along Fiji Way.
- Retain parcels 49M/R/S as a boat launch facility and provide additional amenities to serve non-motorized boaters.
- Co-locate the harbor administration offices, the Lloyd Taber-Marina del Rey Library, and a visitor’s information center around the area currently occupied by the Library.
- Enhance the non-motorized boating amenities and support infrastructure such as parking, rinse areas, restrooms, and storage at Marina Beach and elsewhere in the Marina.
- Continue the use of the “bowl” concept to guide building heights throughout the Marina, developing taller buildings outside of Admiralty Way and Via Marina and shorter buildings along the waterfront.
- Develop urban design guidelines to assist in the design of public and private redevelopment projects.
- Develop multi-modal mobility hubs that would co-locate vehicular, transit, bicycle, and pedestrian facilities at strategic locations throughout the Marina and serving each activity district.
- Develop park-once districts around the mobility hubs to consolidate parking and allow people to quickly enter the Marina, park, get out of their cars, and navigate the Marina without the use of cars.
- Improve directional signage.
- Develop gateway signage at main access points to the Marina.
- Enhance bicycle and pedestrian paths and the overall walkability of the Marina.
Implementation

Implementation of the Vision Statement will take place in short-term and long-term phases, and could necessitate a number of actions to realize the ideas and recommendations contained in this document. These recommendations will be used to guide:

- Decisions concerning individual projects.
- Negotiations for lease extensions and new leases.
- Work programs for County departments with responsibilities in the Marina.
- Potential policy changes regarding the Marina del Rey Local Coastal Program.

Implementing these recommendations can be achieved incrementally as redevelopment opportunities arise, and would consist primarily of enhancements to existing development and investment in public facilities. Proactively developing mobility hubs in all areas of the Marina and developing design guidelines will allow most of these recommendations to be implemented.
VISIONING PROCESS

Goals of the Visioning Process

In April 2013, the Department of Regional Planning (DRP) initiated a visioning effort to guide future public and private development in Marina del Rey. The following goals were identified for the visioning process:

- Provide different opportunities for the Marina del Rey community to provide input into a shared vision.
- Produce a guide for development that may occur over the next 15 to 20 years in the Marina.
- Guide future policy and implementation strategies that ensure consistency with the goals of the Marina del Rey Local Coastal Program (LCP).
- Guide the County’s efforts in their review of projects and delivery of public services that reflect the future needs of the community.

Input

The recommendations provided in this document are based in part on information gathered during a focused public outreach process conducted over the course of eight months in 2013. During that time, DRP engaged residents, business proprietors, recreation enthusiasts, other stakeholders, and advisory bodies in a process designed to solicit input and ideas about what type of community the Marina should be in the future and the types of amenities it should offer.

With the aim of providing different opportunities for the Marina del Rey community to provide its input, DRP staff worked with other Los Angeles County departments and outreach consultants to host a series of events to gather ideas for a shared vision. These events included a community-wide town hall meeting, a community-wide workshop and walking tour, numerous focus groups, stakeholder interviews, and an interactive town hall-style website. Staff also met and spoke with many individuals directly who conveyed their thoughts and concerns about the Marina.

Input continued through August 2014, as County staff continued to meet with stakeholder groups and individuals interested in providing comments.

The Marina del Rey visioning process primarily focused on gathering community and stakeholder input to guide future policy decisions. Members of the public who participated in the outreach process represented
numerous interests and stakeholder groups, and offered a range of perspectives and priorities. These groups include non-motorized and motorized boating groups, retail and hospitality businesses, and residents. DRP also sought input from the Regional Planning Commission, Small Craft Harbor Commission, and Design Control Board.

The participants in the visioning process and the advisory bodies provided a wide variety of comments, concerns, and suggestions regarding the user experience and visions for the future of the Marina. Comments ranged from specific ideas about uses within geographical areas of the Marina to those regarding Countywide and regional matters. Summaries of the comments received at outreach events, the town hall-style website, and meetings with advisory bodies are contained in Appendices A and B.

The comments provided covered a range of topics including:

- Improve the Marina’s identity as a destination for leisure and recreation activities.
- Expand open space and recreational opportunities.
- Update the Marina’s infrastructure and the appearance and location of some of the uses.
- Improve directional signage and other guides to make reaching a destination in the Marina easier and more direct.
- Make it easier for people to enter the Marina and access its facilities.
- Improve the ability of visitors, pedestrians, residents, bicyclists, vehicles, boaters, and other users to move around the Marina easily, efficiently, and safely.
- Enhance people’s ability to enjoy themselves in the Marina through opportunities such as dining, shopping, and boating.
- Improve and expand the main walking path along the water’s edge in the Marina.
- Improve views of the water.
- Orient uses and activities in the Marina toward the area of land closest to the water’s edge to take advantage of views of the water and activities taking place upon it.
- Improve the level of comfort people feel while in the Marina.

In support of the outreach effort, DRP contracted with consultants to perform critical analyses of existing conditions in the Marina. These consultants reviewed and analyzed: market conditions to determine the types of uses for which there is demand in the Marina; mobility conditions to suggest improvements for the efficient and safe circulation of people around the Marina; and, land use conditions to suggest an appropriate land use arrangement for an urban harbor. Specific suggestions from the consultants follow. Technical memoranda from these consultants can be found in Appendices C, D, E, and F.

**Market Study**

A market study was conducted to analyze socio-economic characteristics (e.g., population, income, demographics, etc.) and the retail, hotel, and office markets. This market analysis identified a range of uses the market could support in Marina del Rey and provided guidance on the types of land uses being proposed.

The take-away ideas regarding market-supported opportunities in the Marina are:

- The Marina del Rey market can support potential additional retail development of 206,000 square feet.
• Future office development should be for less-traditional, creative space.
• There is potential support for approximately 610 to 940 additional hotel rooms.

**Mobility**

An analysis of the various modes of transportation, parking facilities, directional signage, and infrastructure currently serving Marina del Rey was conducted, and areas for improvement were identified. The analysis identified potential mobility focal points within the Marina that would provide enhanced opportunities for residents and visitors to move in and around the Marina more easily, consistent with community input.

The analysis found that there is more than sufficient parking in the Marina, but that the appropriate quantities are not serving the areas with demand. Additionally, once people park in one of the many lots in the Marina, it is not clear how to get to their destination or travel between destinations, nor are they encouraged to travel between destinations.

The Promenade is intended to be a continuous walkway along the bulkheads of the Marina del Rey harbor, providing public access to and views of the waterfront, where safety permits. An assessment found that almost two-thirds of the Promenade measured 10 feet wide or less leading to inevitable choke points and conflicts between users. In addition, the Promenade does not continue around the entire Marina, which impedes internal circulation and enjoyment of the facility.

Existing conditions in the Marina pertaining to the boating experience were also examined. The distance between boater parking and key amenities and facilities, availability of boat storage and launching areas, and both landside and waterside boater directional signage needed improvement.
The take-away ideas regarding mobility are:

- **Create Mobility Hubs**: Mobility Hubs are locations where modes of travel come together at key locations and provide the opportunity for convenient transfers between modes. These hubs will provide the Marina’s residents and visitors with convenient mobility options beyond using their car. Mobility hubs can be located in or adjacent to a centralized parking facility that serves adjacent uses and provides public parking opportunities, and can include or have nearby co-located WaterBus stops, landside transit stops, bicycle facilities, bicycle parking, bicycle sharing kiosks, pedestrian access, visitor and directional information, and car sharing opportunities.

- **Implement a “Park Once” Strategy**: Marina del Rey has a substantial number of public parking lots. Existing lots are rarely full, so there are opportunities to repurpose portions of parking lots to provide Mobility Hubs and additional transportation options. A “Park Once” district with shared parking is recommended in each district to operate district parking more efficiently (both public lots and private off-street facilities), and consolidated parking facilities could eventually serve these districts. Existing public parking capacity would be retained and consolidated into structures when necessary. The “Park Once” districts include the areas around Marina Beach, the Lloyd Taber-Marina del Rey Library, Burton Chace Park/Waterside Shopping Center, and Fisherman’s Village.

- **Accommodate Bicycles**: Existing conditions for bicycle facilities found a mix of high quality off-street bike facilities, with some conflict zone areas. Recommended mobility enhancements include a series of specific design treatments, such as signage and pavement striping, to improve visibility and safety at conflict locations, as well as strategies to fill in gaps in the system. A multi-use promenade that can also serve bicyclists is also recommended.

- **Expand Transit**: Existing transit service in the Marina is infrequent, and transit stops are hard to find and have few amenities. Similar conditions are present with the Marina’s WaterBus. Mobility recommendations include co-locating transit stops (both ground and water, where feasible) at Mobility Hubs with clear directional signage and good schedule coordination to ensure easy transfers between transit modes. If financially feasible, improving service frequency is recommended so the beach shuttle can better serve those traveling within the Marina. The light rail service being considered for Lincoln Boulevard provides an opportunity to expand connections to regional transit and encourage greater auto-free access to the Marina.

- **Enhance Boating Facilities**: Recommendations for boaters are focused on providing high-quality dedicated facilities (such as parking); avoiding conflicts with other modes at boat launch areas and locations where boaters have
trailers; and providing opportunities for using small watercraft for personal mobility within the Marina (short-term/visitor docks, waterside directional signage, and other improvements).

- **Accommodate Pedestrians:** Existing pedestrian signalized crossings are generally spaced far apart, and sidewalks are typically narrow. Recommended enhancements include the introduction of additional signalized pedestrian crossings, as well as wider sidewalks, and design treatments on shared mole roads to improve the pedestrian experience in the Marina. Existing crossings in Marina del Rey could be enhanced to improve pedestrian safety and comfort. A multi-use waterfront promenade that can serve the entire Marina is also recommended.

- **Redirect Vehicles:** The roadways in the Marina are impacted by cut-through traffic, and existing parking lots and driveways are at times difficult to find. Mobility recommendations include improved vehicle directional signage and access to parking lots and Mobility Hubs to ensure direct, convenient connections to parking facilities and alternative transportation options. Because traffic level of service in the Marina generally operates at an acceptable level, additional roadway capacity enhancement projects beyond those required by the Marina del Rey Local Coastal Program (LCP) to accommodate development allowed by the LCP are discouraged, as they will encourage additional regional cut-through traffic.

- **Improve Directional Signage:** Directional signage is a critical component of successful navigation. Signs on the street, whether static (e.g., traditional street signs pointing to specific destinations) or dynamic (e.g., electronic signs that point users to currently available parking supplies) are an important measure for making navigation work effectively and efficiently. Additional pedestrian-level signage would connect visitors to amenities such as restaurants, recreational boating, day charters, bicycle rentals, and the Promenade.

**Urban Design**

A strengths and weaknesses analysis was conducted that critically assessed the Marina’s existing physical conditions. This research covered such topics as the Marina’s local and international identity, sense of place, ease of mobility, pedestrian connections, parking, view corridors, uses, and the private realm. Also performed was a case-study analysis to identify elements of other successful marinas from around the world to inform a design for a harbor and selection and arrangement of land uses.

In conducting an analysis of existing conditions in the study area, dated infrastructure, such as the older portions of the waterfront promenade, the quality and style of some new development, and obstructed views of the harbor from Admiralty Way and Via Marina detract from the ambience of the Marina. It was also found that there is a lack of unifying landscape elements throughout the Marina. Recommendations include preparation of urban design guidelines to address elements of the built environment aside from land use.

The analysis also identifies public gathering spaces as a critical ingredient for enhancing the Marina’s future land use scenarios. Activity districts, which are areas with clusters of similar or related uses, are suggested as a means of creating sense of place, and are also enhanced by the mobility hubs identified in the mobility study.

The take-away ideas regarding urban design are:

- **General Comments**
  - Encourage street furniture, dining and general seating options, and other urban design amenities to
activate the Promenade with day- and night-serving uses.

- Create active public gathering spaces adjacent to the Promenade and also treat them as view corridors and as places to be the focus for new uses.
- Consider bringing in attractions, performing arts pavilions, and other unique facilities that can be a catalyst for restaurant, retail, and other visitor services.
- Repurpose parking lots (where feasible) for public gathering spaces shared with restaurants/retail.
- Ensure sensitivity of existing and future development to the physical and visual relationship to the waterfront.
- Create a better sense of place by introducing a greater mix of compatible uses, particularly near the waterfront.
- Continue the use of the “bowl” concept to guide building heights throughout the Marina, developing taller buildings outside of the loop roads and shorter buildings along the waterfront.
- Introduce at least one mobility hub in each activity district.

• Marina Beach Area (Marina Beach Activity District): The general land use and urban design recommendations for this area aim to realize a more local-serving and family-oriented atmosphere with an emphasis on recreation and non-motorized boating activities.
  - Dedicate the beach area and current beach cabana/restroom area to recreational, retail, and restaurant uses for pedestrians, bicyclists, families, non-motorized boaters, visitors, and residents. Shared parking would be available primarily in the current locations with a mobility hub located adjacent to the waterfront near Panay Way.
  - Locate boater-related operations, services, storage and parking shared with adjacent commercial and recreational uses as close as possible to Marina Beach.
  - Locate low-to mid-rise hotel and/or visitor-serving uses on the parcels facing Marina Beach.
  - Provide bistros with outdoor dining, new attractions, unique retail, an improved waterfront promenade along Marina Beach, and new improved pedestrian linkages connecting the Marina Beach promenade to adjacent basin promenades.
  - Construct an enhanced gateway near the intersection of Washington Boulevard and Via Marina.

• Admiralty Way Area (Visitor’s Row Activity District): The general land use and urban design ideas for this area aim to realize a more visitor- and resident-serving atmosphere with an emphasis on retail, restaurants, civic uses, and office opportunities for smaller professional firms and start-ups north of Bali Way. The ideas also aim to realize enhanced entertainment destinations with an emphasis on retail, restaurants, and cultural amenities along Admiralty Way. Major features are:
  - Reconfigure the area from the Fire Station to Mindanao Way into a waterfront-oriented mix of uses with clusters of restaurants with outdoor dining and specialty retail linked together by a new enhanced, straight, and continuous waterfront promenade. On the waterfront, there would be well-defined view corridors, short-term/visitor docks, second levels with bars and night clubs, and potentially a select-service hotel with rooftop amenities.
  - Develop a new civic center just north of Bali Way on the west side of Admiralty Way and combined with a mobility hub. The civic center would co-locate harbor administration facilities with a visitor’s information center and the Lloyd Taber-Marina del Rey Library on one site. This same alternative would develop a creative-office complex across Admiralty Way on the east side that is envisioned to be occupied by smaller professional firms and start-ups.
  - Retain the existing boat launch and storage facility and enhance non-motorized boater amenities.
The parcels could accommodate a multi-modal mobility hub, boat storage, and dinghy short-term/visitor docks.

- Construct enhanced gateways near the intersections of Bali, Mindanao, and Fiji Ways with Lincoln Boulevard.

- **Fiji Way Area (Boater’s Way Activity District):** The general land use and urban design ideas for this area aim to realize a more boater-serving atmosphere with an emphasis on launching, storage, service/repair, charter boat operations, and parking to support these uses:
  - Retain boat servicing, repair, and operations uses.
  - Construct a continuous waterfront promenade where possible, taking into account safety considerations, with additional pedestrian linkages to make walking and bicycling more pleasant for visitors and residents.
  - Revitalize the existing visitor-serving retail center along the Main Channel by bringing in a waterfront-oriented mix of uses and enhancing the center’s aesthetics.

- **Urban Design Guidelines:** Develop an updated set of urban design guidelines to address elements of the built environment such as building design, promenade design, lighting, gateways, and the provision of public furniture.

**Themes**

The following list includes the overarching themes that emerged from this input process and represent areas to address in the Marina.

- Create activity districts.
- Improve mobility and directional signage.
- Enhance the image of the Marina and its built environment.
- Enhance recreation opportunities.
- Provide public gathering spaces.

These themes are discussed in greater detail below.

**Activity Districts**

The participants and consultants involved in the visioning process identified areas where existing activities are currently clustered. However, even with recreational activities and special events occurring in clustered areas, the Marina still requires visitors and residents to travel to numerous places to take advantage of the amenities it has to offer.

The take-away ideas from the public and consultants concerning activity districts are:

- Organize uses in the Marina into districts.
- Create a dedicated civic center area to serve as a community anchor.
- Identify spaces for arts and culture, including public art, to broaden the mix of activities and attract different kinds of visitors who otherwise would not have experienced the Marina.
- Recognize and support the different uses and user groups at Marina Beach.
- Enhance the non-motorized boating activities and support infrastructure such as parking, restrooms,
rinse areas, and storage at Marina Beach and elsewhere in the Marina.

- Increase family-oriented activities at Marina Beach.
- Enhance the visitor-serving retail with entertainment uses in the area along Fiji Way.

**Mobility and Directional Signage**

A large number of comments and suggestions provided by the community, stakeholders, and consultants were directly related to issues of accessibility and mobility. In particular, there was concern that getting around the Marina is not easy, reliable, or as safe as it could be. Pedestrian circulation is hindered by a non-continuous promenade, by the separation of employment areas and hotels from visitor-serving uses by narrow sidewalks often peppered with obstructions and by busy streets with limited pedestrian crossings, and by competition for space with other uses. Inconvenient and hard-to-find parking arose as another issue.

The take-away ideas from the public and consultants concerning mobility and directional signage are:

- Develop mobility hubs at strategic locations throughout the Marina where modes of travel come together and provide the opportunity for convenient transfers between modes.
- Implement “park once” districts to consolidate public parking centered on the mobility hubs.
- Provide year-round WaterBus service and add a shuttle to serve all parking lots and key Marina destinations.
- Enhance and provide clear directional signage to and from shuttle stops, WaterBus stops, and specific destinations.
- Provide convenient parking and access for boaters and their trailers.
- Ensure a continuous pedestrian promenade along the waterfront where possible through the entire Marina.
- Improve bicycle facilities throughout the Marina.
Image and Built Environment

Many community members provided their impressions of the Marina. The impression was that while the Marina continues to attract a wide variety of visitors, its development pattern does not emphasize the waterfront and available water-based activities and its overall ambience and appearance do not reflect that of a world-class facility. For this and other reasons, members of the community expressed concern that the Marina continues to be an afterthought in many people’s minds. The consultants also noted that some of the Marina’s architecture and infrastructure were generally dated. Further, it was determined there is not enough range of activities in the Marina to cater to the needs and desires of visitors and residents.

The take-away ideas from the public and consultants concerning image and the built environment are:

- Beautify the Marina by updating infrastructure and encouraging high-quality design for new public and private developments and the promenade.
- Provide additional restaurant, retail, and cultural activity opportunities for visitors and residents, particularly near the waterfront.
- Improve the perception of the Marina as a functioning harbor by integrating views of boating activities into public and private development.
- Highlight the Marina’s wetland history by incorporating interpretive elements into public areas.
- Promote the Marina’s diversity of wildlife.
- Announce arrival to the Marina by incorporating unique gateways at vehicular, bicycle, and pedestrian access points.

Recreation and Activities

Marina del Rey features an array of activities on land and water. Community members recognize this as the strength and attraction of the Marina. Non-motorized and motorized boating stakeholders as well as community members emphasized that boating is especially critical to the Marina’s culture and economy. Boating-related issues raised by the community ranged from a lack of adequate support infrastructure and waterside
directional signage to the need for tie-up boat slips near restaurants and at the waterfront to access landside facilities. The consultants also noted the importance of the recreational character of the Marina and provided suggestions for minimizing conflicts between these users and other visitors and residents.

The waterfront and the Promenade were also highlighted as critical components of Marina del Rey. In addition to the access and circulation issues discussed above, the Promenade is underutilized and some felt that it can be unsafe for co-existence of different uses.

The take-away ideas from the public and consultants concerning recreation and activities are:

- Minimize locations where boaters and trailers interact with other modes by creating and maintaining access areas separate from those for general harbor visitors.
- Include a trailer queuing area prior to and following boat launching.
- Recognize and support the different uses and user groups at Marina Beach.
- Enhance boater amenities and support infrastructure at Marina Beach and provide additional facilities for non-motorized boaters in other Marina locations.
- Install short-term/visitor docks at visitor- and resident-serving and civic locations such as restaurants, shops, and the library.
- Expand family-oriented recreation opportunities.
- Promote and enhance the area’s wildlife-viewing opportunities.

**Public Gathering Spaces**

Many of the participants expressed a desire to see more spaces for people to gather and enjoy the amenities that the Marina has to offer. The impression was that while the Marina currently offers a number of places for
people to engage in outdoor activities, there could be more opportunities provided in all parts of the Marina. The consultants also noted that public gathering spaces are essential in defining places within the Marina.

The take-away ideas from the public and consultants concerning public gathering spaces are:

- Develop vibrant waterfront public gathering spaces at strategic locations supported by recreation, food, and entertainment options.
- Use public gathering spaces as focal points for new development.
- Use new public gathering spaces as view corridors to the water and activities occurring upon it.
- Provide traditional green park space where possible.
- Provide additional lighting along the promenade and throughout the Marina (waterside and landside) to increase safety.
- Install street furniture at public gathering spaces.

**RECOMMENDATIONS**

Marina del Rey should be a safe, easily-navigable, attractive, enjoyable, and economically-robust community for everyone, whether they are visitors, small-craft boaters, residents, shoppers, business proprietors, bicyclists, or curious tourists. Based on the extensive community input and analyses from the technical and consulting teams, the Department of Regional Planning developed a series of recommendations that will help guide the development of Marina del Rey into a world-class and vibrant destination and community.

**Land Use Recommendations**

The results of the public input gathered and the technical work prepared by the consultants were combined to identify the types of uses that could be located successfully within Marina del Rey and general locations for
their development. Using this information, the County makes the following land use recommendations:

- Group land uses into four districts. These districts are not intended to be exclusive; that is, they are not intended to exclude other compatible land uses.
  - The Residential District is intended to remain a predominantly residential area supported by resident-serving uses.
  - Marina Beach is intended to be developed with marine-related, beach-oriented, and other related uses.
  - Visitor’s Row is intended to be developed with visitor- and resident-serving uses and amenities.
  - Boater’s Way is intended to be a boating center where boating-related businesses and services are located.
- Retain boat service, repair, and operations uses along Fiji Way.
- Retain parcels 49M/R/S as a boat launch facility with boat storage and additional amenities for non-motorized boaters.
- Co-locate visitor’s information, harbor administration offices, and the Lloyd Taber-Marina del Rey Library around the area currently occupied by the Library.
- Enhance the non-motorized boating area and support infrastructure such as parking, restrooms, rinse areas, and storage at Marina Beach and elsewhere in the Marina.
- Continue the use of the “bowl” concept to guide building heights throughout the Marina, developing taller buildings outside of Admiralty Way and Via Marina, and shorter buildings along the waterfront.
- Develop urban design guidelines to assist in the design of public and private redevelopment projects.
Mobility Recommendations

The results of the public input gathered and the technical work prepared by the consultants were combined to identify a series of enhancements to the mobility and circulation system that would improve the ability of people to get around the Marina efficiently and safely. Using this information, the County makes the following mobility recommendations:

- Develop multi-modal mobility hubs that would co-locate vehicular, transit, bicycle, and pedestrian facilities at strategic locations throughout the Marina and serve each activity district.
- Develop park-once districts to consolidate parking and allow people to quickly enter the Marina, park, get out of their cars, and navigate the Marina without the use of cars.
- Improve directional signage.
• Develop gateway signage at main access points to the Marina.
• Enhance bicycle and pedestrian paths and the overall walkability of the Marina.

IMPLEMENTATION PROGRAM

Intended Use of the Vision Statement

Implementing the recommendations discussed herein can be achieved through a number of mechanisms, including enhancements to existing development and by use of urban design guidelines that will be developed by the County. This Marina del Rey Vision Statement will serve as a guide for future development in the Marina. County departments will refer to this Vision Statement to guide:

• Decisions concerning individual project components.
• Negotiations for lease extensions and new leases.
Work programs for County departments with responsibilities in the Marina.
Policy changes regarding the Marina del Rey Local Coastal Program.

Implementation Actions

This section identifies actions that could implement the recommendations contained in this vision, as well as the department responsible for implementation. The following table details whether an action could be accomplished in the short-term or in the long-term, though some actions may occur under both time frames. The County will undertake the short-term implementation actions as its priorities while incorporating the long-term actions into the work programs of the appropriate department or agency.

<td>DRP/DBH</td>
</tr>
<tr>
<td>Attract a regional-draw-type use to the Marina</td>
<td>DRP/DBH</td>
</tr>
</tbody>
</table>

**Annual Work Programs**

The implementation actions identified in the table above will be accommodated by the annual work programs of DRP, DBH, and DPW, as staff and resources become available, and as land use opportunities arise.

**Urban Design Guidelines**

The urban design guidelines will be crafted such that they provide direction on appropriate redevelopment and infrastructure projects so the Marina is developed in a consistent, coherent, and high-quality manner. Unlike the Marina del Rey Specific Plan, which contains detailed development standards, the design guidelines are intended to shape the general character, look, feel, and composition of Marina del Rey.

The urban design guidelines will serve in an advisory capacity to allow the contents to evolve over time as needs, tastes, and trends change. It is expected that the guidelines will be used by the development community, staff at DRP and DBH, and the Design Control Board to guide and inform redevelopment in the
BACKGROUND

History and Setting

Marina del Rey is an unincorporated community in Los Angeles County bounded by the City of Los Angeles on all sides with Washington Boulevard on the north, Lincoln Boulevard and the Ballona Wetlands on the east, the Ballona Creek and Marina del Rey harbor entrance channel on the east and south, and the community of Venice on the west. Marina del Rey encompasses 807 acres, and the area’s land and water is owned by the County of Los Angeles and leased to private leaseholders on long-term agreements. Today, it is the largest constructed small-craft harbor in North America and Marina del Rey is home to approximately 9,000 residents.

Marina del Rey as it exists now was a long time in the making. Construction of the jetties for the present entrance channel began in December 1957, but efforts toward realizing a harbor at this location actually began some twenty years earlier. After many years of construction delays, storm damage, and other assorted development issues, Marina del Rey eventually progressed toward completion. A formal dedication of the Marina del Rey Harbor was held on April 10, 1965.

Visioning Process

In April 2013, the Los Angeles County Department of Regional Planning (DRP) embarked on a wide-ranging outreach effort to solicit public input in crafting a vision for the future of Marina del Rey. The ideas generated by
the community over the course of the process have been used to develop future policy and implementation strategies for improving this important County asset.

As part of the comprehensive community outreach process, DRP staff worked with the outreach consultant to design and initiate a broad-based community dialogue informed by targeted research and information gathering. The team employed a range of methods and formats to provide opportunities for the whole of the Los Angeles County community to participate, with an emphasis on the process being interactive. The outreach program included community workshops and an interactive website to enable a virtual marketplace of ideas accessible by all.

These sessions generated valuable input and insights as to how residents and visitors interface with the Marina on a regular basis, setting the foundation for further research and discussions with the community.

County staff also fielded telephone calls and emails from many individuals and met with individuals requesting additional information and wishing to contribute their ideas and voice their concerns.

The County used the data accumulated during the visioning process to develop a new vision for guiding development in the Marina over the next 15 to 20 years. This Vision Statement is the framework that will guide the Departments of Regional Planning, Beaches and Harbors, and Public Works with the delivery of public services that reflect the future needs of the community.

**Background Studies**

Following this document are a series of technical memoranda detailing the design of the outreach process, existing conditions, analyses performed, and recommendations made by the outreach, market, mobility, and architecture/urban design firms that assisted DRP in the Marina del Rey visioning process. These memoranda, along with the input received from the community and stakeholders, form the foundation upon which the recommendations described above are based.
